Data Centre
數據中心

The building block to mitigate your business risk
助你減低業務風險的基礎網絡架構

HKBN Enterprise Solutions offers a fully integrated disaster recovery solution in a Tier 3+ data centre with ultra-low latency dark fibre connectivity. Our network infrastructure also provides the perfect foundation for customers to design and build, host, co-locate, and manage a reliable and secure private cloud. Your data is safe with our internationally certified centres located in San Po Kong, Tseung Kwan O Industrial Estate and Kwai Chung

香港寬頻企業方案的 Tier 3+ 數據中心配備極低網絡遲延暗光纖連接，為客戶提供整合式災難恢復方案，可讓客戶在穩健網絡基礎下安全可靠地設計、建設、寄存、托管及管理私有雲，並將伺服器寄存於備有國際認證的數據中心，分佈在新蒲崗、將軍澳工業邨及葵涌

Features and Benefits
功能及優點

Low Latency
低時延

Powered by dark fibre and dense wavelength division multiplexing (DWDM) technologies for access to major Internet exchanges around Hong Kong in microsecondsT

透過暗光纖和密集波分用(DWDM)技術，可在瞬間連接到香港主要互聯網交換中心

Direct Connection to Overseas
直接連繫海外

Using the shortest dedicated paths to overseas companies and data centres via premium dedicated internet access (PDIA)

卓越專線服務(PDIA)提供直接專線，能迅速連繫海外公司及數據中心

Dual Carriers Diversity
雙軌光纖網絡

Maintain data security and uninterrupted connection via a trustworthy contingency plan

提供可靠的備用方案，確保數據的安全性和互聯網的穩定連接

High Bandwidth
高效頻寬

Real-time data synchronisation and server farm virtualisation are made possible with up to 10Gbps broadband services

提供高達10Gps頻寬，實現數據同步及數據中心虛擬化

How It Works
技術概覽

In compliance with Tier 3+ Standard
數據中心符合國際第三級(Tier 3+)標準

Operation
操作標準

- ISO27001, ISO20000-1, ISO14001 Certified
  ISO27001、ISO20000-1 、ISO14001 認證

- Level II IT Security Guidelines issued by the government of HKSAR
  香港特別行政區政府頒佈的《資訊科技保安指引》第2級保安標準

Infrastructure
基建標準

- LEED Gold standard
  LEED 金級認證

- Conforms with TIA-942 Tier 3+, GB50174-2008, FISC standard
  符合 TIA-942 Tier 3+、GB50174-2008 及 FISC 標準

Direct and Reliable Network Access
直接可靠的網絡連接

Direct and scalable network connectivity to Hong Kong Internet eXchange (HKIX), mainland China & Overseas carriers, and major local & global Internet exchanges via dark fibre and DWDM
透過暗光纖及密集波分複用(DWDM)技術，可直接連接香港國際互聯網交換中心(HKIX)、中國內地及海外電訊商，以及本地與環球主要互聯網交換中心取得網絡連接

Tsuen Wan
荃灣

Kwai Chung
葵涌

San Po Kong
新蒲崗

Kowloon Bay
九龍灣

Kwun Tong
觀塘

Tseung Kwan O
將軍澳

Chai Wan
柴灣
