

**SERVICES-BASED OPERATOR LICENCE
TELECOMMUNICATIONS ORDINANCE (Chapter 106)**

WTT HK LIMITED (“WTT”)

B. HOMELINE SERVICE

Effective Date: 28/8/10

HomeLine service provides an exchange line, which connects residential Customer at a place of residence to the Network. The Customer will be assigned a directory number and free directory listing. The service allows the Customer to make/receive calls.

Available value-added service (“VAS”) features include:

- **Speed Call**
This feature allows the Customer to store up to eight numbers on a Speed Call list. Stored numbers can be dialed by pressing the * key and a one-digit code.
- **Block-the-blocker**
With calling number display, this feature can block the anonymous callers, who choose not to transmit their telephone numbers, by diverting their calls to an announcement, which informs them that their calls cannot go through.
- **Call Forwarding**
This feature allows the Customer to forward the incoming calls to another local telephone number, including mobile or pager numbers.
- **Call Waiting**
This feature alerts the Customer when an incoming call is waiting while the Customer is on the telephone.
- **Calling Number Display**
This feature allows the display of caller’s telephone number and the automatic recording of the date, time and calling number of missed calls.
- **Conference Calling**
This feature allows the Customer to converse with two other parties who are located at two different locations at the same time.
- **Duplex Ringing**
This feature allows the Customer to have one primary telephone number and one "Duplex Ringing for Fax" number on a single registered line and each of the two numbers will have a ringing pattern distinct from each other.
- **MobileRing**
This feature allows the Customer to receive calls forwarded from local mobile service with ringing tone distinguishable from the registered line’s.
- **Remote Call Forwarding**
This feature allows the Customer to remotely divert all incoming calls to any local number including mobile or pager numbers.
- **Call Blocking**
This feature allows the Customer to restrict certain types of chargeable outgoing calls, inter alias, IDD and 900 information services, from the Customer’s registered line.
- **Calling Number Blocking**
The feature allows the Customer to restrict the display of the telephone number to the receiving party except for calls to 999 emergency hotline.
- **Appointment Reminder**
This feature allows machine-generated calls made to the Customer at pre-set time.
- **Do-Not-Disturb**
This feature allows the Customer to temporarily block incoming calls. When this feature is activated, the calling party (except callers authorized by the Customer) will hear a Do-Not-Disturb announcement message.
- **Voice Mail**
This feature allows instant telephone message alert and retrieval.

Service / Activity:	Charges (HK\$)
