WTT HK LIMITED (“WTT”)

J29. Asure Security Service

Asure Security Service is a suite of security protection services, comprising Asure Security – Managed Security Service and Asure Security – DDoS Mitigation Service (the “Services”).

The Asure Security – Managed Security Service is a managed security service that combines advanced threat prevention technology, certified security professionals and 24/7 security operations centre (SOC) providing a suite of security services to help safeguard Customer network and systems. It includes the Distributed Denial of Service (DDoS) Mitigation and Unified Threat Management (UTM) attack protection.

The Asure Security – DDoS Mitigation service provides a gateway against volumetric DDoS attacks to safeguard customer network. It will help the Customer to detect and clean attack traffic via DNS-based approach. It provides an on-demand DDoS protection by re-routing clean traffic to dedicated secured link connected to the Customer’s premises.

To enjoy the Services, the Customer is required to subscribe WTT Fibre Business Broadband service. Services are subject to the following applicable tariffs and terms and conditions.

(i) Asure Security – Managed Security Service

Remarks

Monthly Report in web service portal will only provide data information up to the last 3 months.

The provision of the Service is subject to WTT's General Terms and Conditions of Service as revised and published from time to time.

In addition to WTT's General Terms and Conditions of Service, the following special conditions shall apply to the Service:

1. The Customer shall indemnify and hold harmless WTT against any liability, claim, loss, damage or expense arising from the use of the Service by the Customer or the Customer's authorized users.
2. The Customer acknowledges that deployment of the Service does not achieve the impossible goal of risk elimination, and therefore WTT does not guarantee that intrusions, compromises, or other unauthorized activity will not occur on Customer's network.
3. For Azure Security – Managed Security Service, WTT shall grant to Customer a licence to use the Software on the Security Gateway Hardware during the term of the Service in accordance with the Contract.
4. Provision of any updates and bug fixes for the Software will be at the sole discretion of WTT.
5. Customer agrees that the Software may collect and communicate certain software, hardware, and use information to WTT or WTT's service providers' servers for the purpose of :
 - checking for and performing any updates;
 - ensuring that Customer has complied and is complying with the Contract, including Customer's use of valid software key codes, hardware keys, or both; and
 - tracking and monitoring of security intrusion.

The information collected and communicated does not include any proprietary application data. WTT will not provide any of the information to any third party except as required by law or legal process or to enforce compliance with the Contract.
6. The Customer shall be responsible for any domain and/or DNS record updates required prior activation of the Services.
7. The Service is subject to the Customer's equipment(s) meeting the relevant specifications for interoperability with WTT's Network. Any equipment which the Customer intends to connect to WTT's Network must be approved by WTT prior to any connection, and must be in compliance with the technical standards specified by WTT. At the time of application for Service the Customer must provide all details regarding the equipment which it intends to connect to WTT's Network. WTT may reject the application if the required information is not provided or WTT opines that the said equipment does not comply with WTT's technical standards. WTT may at any time, without being liable to the Customer, disconnect the Customer's equipment connected to WTT's Network if:
 - The configurations or technical specifications of such equipment so connected differ from the details previously provided by the Customer;
 - There is malfunction of the equipment; or
 - The provision of the Service to the Customer is terminated or suspended for any reasons.
8. The provision of the Service is subject to site feasibility and available resources of WTT including network coverage to the installation address. The Customer will provide the necessary assistance to facilitate such access including liaising with the respective Building Management Office or building owner, data centre operator or relevant authority, and Customer will be responsible for settling fibre cross connection charge or any surcharges that may be imposed (one-off and monthly recurring).
9. The Service is only available to WTT Business Broadband service with at least 1 fixed IP address.
10. Minimum subscription period for the Service is twenty-four (24) months unless otherwise specified in the Order Confirmation. The Customer shall on demand pay for the monthly charges for the remaining contract period in the event of termination before expiration of the minimum subscription period.
11. The Service does not include connection with WiFi or Internet connectivity. Customer will be responsible for any additional WiFi or Internet connectivity charges incurred when accessing the Service's web portal via notebook and/or mobile phone device(s).
