3.3. 別取“手動設定伺服器”。然後按「下一步」
Tick “Manually configure server settings, then press “Next”

The screenshot shows the 'Add your email accounts' dialog box in Windows Live Mail. The dialog has a title bar 'Windows Live Mail' and a close button. Below the title bar, the text reads 'Add your email accounts' in green, followed by 'If you have a Windows Live ID, sign in now. If not, you can create one later. Sign in to Windows Live'. The main form area contains several fields and options:

- Email address:** A text box containing 'someone@example.com'. Below it is a link 'Get a Windows Live email address'.
- Password:** A text box.
- Remember this password
- Display name for your sent messages:** A text box containing 'Example: John Doe'.
- Make this my default email account
- Manually configure server settings

To the right of the form, there is text: 'Most email accounts work with Windows Live Mail including Hotmail Gmail and many others.' At the bottom right of the dialog are two buttons: 'Cancel' and 'Next'.

在「我的內送郵件伺服器是」選擇 "POP3" 伺服器。
Choose "POP3" in "My Incoming mail server is".

- 3.4. 在「內收郵件伺服器」一欄填上 "pop3.nwtbb.com" 。
Enter "pop3.nwtbb.com" in "Incoming mail (POP3 or IMAP) server"
- 3.5. 在「外寄郵件伺服器」一欄填上 "smtp.nwtbb.com" 。
Enter "smtp.nwtbb.com" in "Outgoing e-mail server (SMTP) name".
- 3.6. 在「外寄郵件伺服器資料」上剔取"要求認證"
Tick "Requires authentication" under outgoing server information
- 3.7. 之後按「下一步」。
Then press "Next".

Windows Live Mail

Configure server settings

If you don't know your email server settings, contact your ISP or network administrator.

Incoming server information

Server type: POP

Server address: pop3.nwtbb.com Port: 110

Requires a secure connection (SSL)

Authenticate using: Clear text

Logon user name: User_ID

Outgoing server information

Server address: smtp.nwtbb.com Port: 25

Requires a secure connection (SSL)

Requires authentication

Cancel Back Next

4. 按「完成」離開。
Press "Finish"
