Cloud Video - Presence Communicator S

Cloud Video service is an advanced, state-of-the-art unified communications service. Apart from voice services which consists of full-featured IP telephony and performs all the functions of a traditional telephone with the added advantages of Mobility Apps S, Sim-Ring, Extension Mobility, Remote Extension, Presence Communicator S and Cloud Communicator S (softphone), it also provides multiple parties video call conference. It helps to enhance the operational efficiency of your business and assures that your colleagues can always stay in touch with your business partners anytime, anywhere.

Presence Communicator S is an innovative communications application for your Android device and turns it into a fully featured IP telephone. It allows you to display your Cloud Video number as well as multiple parties video calls when making outbound calls to your business partner, no matter where you are.

Important Note:

Your network connection must be

- *connected with Internet without any blocking of port '80' & '443'.*

1. Download Presence Communicator S

1.1 Cisco Jabber

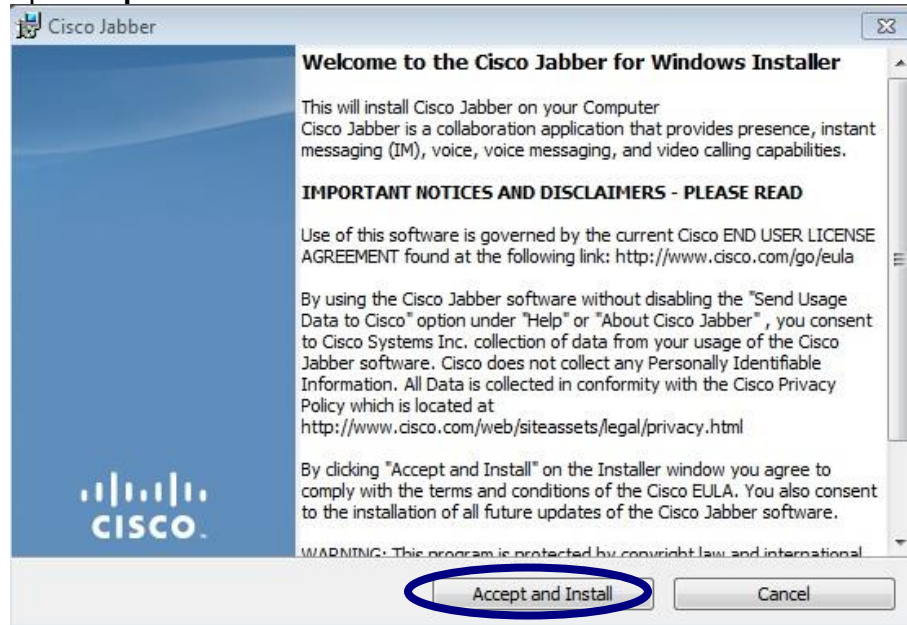

1. Go to <http://ads.wtt-cloudvoice.com/cisco/CiscoJabber-Install-ffr.11-1-2.zip>.
